Hi Everyone,

Andy and I were the only ones on the call. Compliance is still looking good ~80%.

There are 2 repos that need to be looked at:
1. ClimateHealth repo (John is this your repo?) that really doesn't have anything in the repo other than a brief description.
2. Hardware-analytics - I'm not sure who owns this repo? Does anyone know anything about that repo?

Here is a link to our compliance spreadsheet:
https://github.com/Enterprise-Neurosystem/governance/blob/main/AI%20Governance%20Compliance%20for%20EN%20repos.xlsx

Let me know if you have any questions :)
Audrey
